Additional repairs to Twin Nissen huts near Binny Mu.

A -46.

PWD. Letter B2 C. 5828, dated the 4th Oct. 1946. from the Director of Food Supplies in Mysore, Bangalore requesting sanction for an expenditure of Rs 5,000/- involved towards improvements necessary for proper storage to the twin Nissen huts near Binny mills.

1) Submitted: It is stated that the Additional Director Food Supplies (Transport) who inspected the twin Nissen huts near Binny Mills suggested certain improvements and that the Executive Engineer Buildings Division who was consulted in the matter had sent up an estimate for Rs 5000/-. In view of urgency the Director of F.S. is stated to have countersigned the estimate

2) The Director requests sanction for the above expenditure of Rs 5000/- involved in this behalf.

3) It is stated that the Executive Engineer has been requested to send a copy of the estimate for reference.

Secy 11/10. 4) The A.D.C. D.F.S. refers in his report to a sketch which has not been enclosed with the P.W.D. Since the D.F.S has already countersigned the estimate and directed its being worked out, a copy of the plan and a copy of the Estimate may be called for before the sanction to the expenditure of Rs 5000 asked for by the D.F.S. is accorded.

To

K. Srinivasan, Esq., B.Sc.,

Secretary to Government, Food Department,

(Camp) M y s o r e.

SIR,

Subject: Additional repairs to the Twin Nissen huts near Binny Mills.

I have the honour to state that the Additional Director of Food Supplies (Transport) inspected the Twin Nissen huts near Binny Mills on 16-8-1946 and suggested certain improvements to the above sheds. A copy of his inspection notes is also enclosed for the information of Government. The Executive Engineer was requested to send an estimate for the improvements as suggested by the Additional Director of Transport. An estimate for Rs. 5,000/- has been received from the Executive Engineer, Buildings Division, Bangalore with his letter No.723 dated 20-9-1946. I have duly countersigned the estimate and returned to the Executive Engineer for taking further necessary action immediately in view of its urgency.

2. Constructing lavatory, providing locking arrangements inside the Twin Nissen sheds, preventing leaks in Twin Nissen sheds, providing cement concrete platform for six gates at each entrance have been provided for in the estimate. The Executive Engineer is being requested to send a copy of the estimate for submission to Government for reference.

3. I request that sanctionof Government may kindly be obtained for an expenditure of Rs.5,000/- involved in this behalf as the improvements are necessary for proper storage.

I have the honour to be,
S i r,
Your most obedient servant,

Director of Food Supplies.

2

INSPECTION NOTE DATED 16th AUGUST 1946.

--:o:--

Sub :- Twin Nissen Sheds Godowns near the Binny Mills.

Due to the heavy rains, I inspected these sheds on the 14th of August. On the 15th I called on the Executive Engineer, Buildings Division and by appointment met his Assistant Engineer on the 16th to come to some understanding regarding the stopping of the leakages. He has promised to plug the little crevices with bitumen and cotton waste. They have already done so for a certain area and this seems to be satisfactory.

2. While I was there, I was shown by the Assistant Engineer, Public Works Department, a letter written by the Assistant Director of Food Supplies, to the Director of Food Supplies. No.ADC.2/1029 dated 7-8-1946 (of which I was not aware of) As a matter of fact this letter could have been referred to me as I am almost every otherday in the Railway Station yard and in a poisiton to dispose of such matters with fair promptness. There are 4 points mentioned in this letter and I will touch upon them one by one.

(a) Hinges etc. Yes. The Assistant Engineer will do that.

(b) Flushing latrine. There are 6 Revenue Inspectors, 6 Bill checkers and 24 Measurers, 36 intelligent men who want latrine apart from other people. The cost of a flushing latrine which has a soak pit and septic tank will cost about Rs. 900/- This is a matter worth considering and I would recommend it.

3. There is a mention of a tap to be erected there. I do not think there is any need. There is already a public fountain No. 197/B opened on 28th June 1907, 5 feet away from one shed and this should do. I have asked the Assistant Engineer to shft the barbed wire fencing and place the public tap outside the enclosure. It seems that there is some reference made to the Municipality to remove the tap and build it somewhere else, because there is a little water splashing arround. I pointed out that all that is needed is a good drain and no one is likely to bear the cost of shifting quite a large charity fountain built 40 years ago.

p.t.o.

d) The fourth item that is mentioned in the Assistant Director of Food Supplies' letter is that the fencing has not been completed alround. This is due to the fact that the Railway Department have given out the land marked R. in the sketch to a Railway Contractor called Chinnana who is a stone merchant. As this matter cannot be settled without the cooperation of the Railway Department, I went to the office of the District Engineer and pointed out that they may should give less land to the stone contractor and let us close the fencing as shown by me in the diagram. The Railway Engineering - Department will consider this and inform me soon. This disposes the Assistant Director of Food Supplies letter dated 7-8-1946 to which I am sending a copy of this inspection note.

3. I pointed out to the Assistant Engineer, Public Works Department that the wooden gates they were putting up for the enclosure are weaker than the fencing and I suggested to him improvements in the gate itself, so that in the case of a crowd pressing against the barrier, the gate would not be the first one to go. I also informed the Assistant Engineer that wooden poles were not firmly fixed in the ground and he promised to put concreting at the bottom to strengthen the construction.

4. There is one more point I would like to mention. There is necessity of a couple of electric lights in the small shed which I have marked X in the picture, so that the staff can do office work at night to write up accounts, etc. There is no doubt that very often they work till late at night and I recommend to the Director to kindly approve this facility of electric lights, the installation of which may cost atmost about Rs. ~~1200~~ 100/-.

5. Lastly I come to a most important item and this is loss of grain when a lorry is unloading just at the doors of the mistri sheds. My inspections show that quite a large amount of grain falls on the ground while the bags are being unloaded from the lorries, and the ground being uneven and rough and some times wet, it is not possible to sweep up all the fallen grains. I suggested to the Assistant Director Engineer, ~~xxx~~ P.W.D. that we should have an area of about 15' x 12' would ~~xxxxxx~~ cement concreted in front of each door, so that when the grain falls fro

from the lorries, the grain may be swept up in a clean and simple manner. The cost of each patch of 12' x 15' would come to about Rs. 100/- and there are 12 doors. So, the total cost would Rs.1200/- I roughly estimate that this department would get back this money in 4 months by the savings effected in picking up easily the grain from the floor. I recommend this suggestion strongly for the approval of the Director of Food Supplies.

SD. R. N. Mirza.

Addl. Director of Transports,
Food Supplies Department.
